

After reading a wonderful account from a fellow club member (Steve Collins) about his experiences targeting bluefin tuna with TunaXXL out of Canso, I quickly decided that this was a 'must do' trip – after a few e-mails, all had been arranged – one of the easiest trips I have ever booked, for which I would like to thank Thomas.

Despite losing two of our allotted nine fishing days due to bad weather, both Neil and I had exceptional fun – Kevin and Howie Jnr were great guys and a lot of fun on the boat, and we were fortunate in that we managed to get a couple of fish each to the boat, with three of the four fish going over the 500lb mark, and the sight of a grander slowly coming up under the boat after a near 2 hour fight was an experience not easily forgotten!

Thomas and Gerhard were very welcoming - despite Gerhard's Rather disturbing recollection of one particular Ramnstein music video's during a BBQ evening which had us laughing for quite a while afterwards!

A great overall experience targeting some of the world's largest gamefish in a very beautiful part of the world.

A big thanks to Thomas and company for the wonderful experience."
